DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 1 – 16 drawn to a protective cap in the reply filed on 5/24/06 is acknowledged.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3-6, 8-14 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Fukutake et al.

Fukutake et al., U.S. Patent No. 5473118 discloses a printed circuit board with an overlay film. As shown in Figure 4, the overlay film 3 is located on a substantially flat base sheet. Connector 2 is located in a cavity in the overlay film 3. As described in column 4, on line 10, the adhesive layer 4 is thermoplastic or thermosetting and is used to attach the film 3.

Allowable Subject Matter

Claims 2 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Polyolefin is not described or suggested as being a metal of the adhesive primer layer.

The prior art does not teach or suggest the thickness of the primer layer.

Claim 15 is allowed.

The prior art does not teach or suggest the recited igloo shaped dome forming a cavity sized for encapsulating a metal conductor.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Soelberg, U.S. Patent No. 3833755 discloses an easily strippable ribbon cable.

Martinelli, U.S. Patent No. 4862593 discloses an ultrasonic transducer.
